

Tuscarora Crapemyrtle

Lagerstroemia x 'Tuscarora'

Tuscarora has blooms of dark coral pink. Red-tinged immature leaves turn dark green in summer, then red-orange in fall. Its exfoliating bark is light brown and Tuscarora is a variety that is resistant to mildew. The habit of Tuscarora is vase shaped with a width of approximately 80% of the height. Matures at greater than 20' tall by 16' wide. Zones 6b-9.
