MAIN STREET®

maple

Acer truncatum 'WF-AT1'

Main Street® is a cultivar discovered & developed by Worthington Farms. Its flaming red-orange fall color is a showstopper! In the spring, foliage emerges with red edges before turning completely green. Its size and symmetrical structure make it a perfect street tree. Main Street® is incredibly heat & drought tolerant & adaptable to a wide variety of soils. Main Street® may be used in areas where Sugar Maple is known to struggle.

Maturity: approx. 20' height x 16' width. Zones: 4-9.

Purpleblow/Shantung Maple
U.S. Plant Patent No. PP 20,109

Emerging spring growth

Vibrant fall color

Ideal size and symmetrical structure for streetscapes, parks, & more!
